

Are you an animal lover AND want to help your local community?

Become a Volunteer Trapper for Shadow Cats Rescue!

Ready-made friends are waiting for you at a great local nonprofit organization benefiting animals and people.

We are looking for cat-friendly volunteers to assist us in our efforts to reduce the overpopulation of feral and community cats through a humane program called TNR (Trap, Neuter and Return). TNR is an effective program to reduce the stray and feral population by trapping and sterilizing the cats and then returning them to their original environment, and it's making a big difference in Central Texas!

After generations of killing them, isn't it about time we tried something different, something that works? **Let's sterilize and vaccinate them !**

All volunteer positions require on the job training and mentoring, which we provide.

Trappers - Trap stray and feral cats one or two evenings a week

Recovery homes - a climate controlled garage or structure where cats can recover from sterilization. Males: 24 hours. Females: 24-48 hours. Pregnant females: 3-4 days.

Cat Transporters - take cats to and from the Austin Humane Society for surgery
For more information, please contact **Shadow Cats Rescue** in Round Rock, Texas at:
