

Kitty Cam Tips

If you access the Kitty Cam and the picture is black, it's probably because you have gone to look at the kitties in the evening or early morning hours. Even our kitties need their beauty rest and we turn out the lights for them in the evening. Please check back during the day.

If you enlarge the image by clicking on the link provided under the Kitty Cam image, you have the option of enlarging the image even more. If you look in the lower right corner of your screen you'll see a little "100%" with a down arrow next to it. When you're on the Kitty Cam, click on this arrow and you'll get a menu of different size options. You can play with them to see what best fits your monitor, but we've found that 200% gives a much larger Kitty Cam image that's still pretty clear, and makes it a lot easier to view individual cats.

Give it a try!
