

What you can't see on the Kitty Cam...

Sometimes on the Kitty Cam you'll see all the cats clustered around the window looking out. Here's what they're so fascinated with - lately the doves have discovered the big bird feeder hanging just outside the window, and often the feeder, tree branches, and fence will all be full of flapping birds. It's their very own live nature show....and this is why birdseed donations are so nice!
